

### REMARKS

In the Communication dated June 19, 2007 in connection with the above-identified patent application, it was stated that applicant has added new claims without an indication as to which of the new claims are readable on the embodiment elected for prosecution on August 31, 2005. In addition, the status identifier of claim 6 was said to be incorrect.

In reply, applicant notes that Group II, drawn to Figures 3A - 3C, was elected for prosecution in connection with the above-identified patent application. As noted in the response dated January 30, 2007, newly added claims 34-43 all read on the invention of Group II, Figures 3A-3C.

As to the objection to the status identifier for claim 6, applicant has identified claim 6 as being withdrawn, currently amended. The reason for amending claim 6 is that it originally depended from claim 5 which was previously cancelled without prejudice.

In view of the foregoing, it is respectfully requested that a substantive Office Action now be issued concerning the above-identified patent application.

Respectfully submitted,

FAY SHARPE LLP
